

Position: Working Student Cross-Platform App Developer (React Native) m/f

About Planerio

With its integrated web and smartphone app services, Planerio digitizes all business processes related to work shift scheduling, increases transparency and thus gains the motivation and satisfaction of the entire workforce in hospitals, medical practices and nursing facilities.

Our App enables employees to take part in the shift planning, by considering their individual wishes and offering the world's first interactive shift swap market.

Because of its unique capabilities and technological lead, Planerio is one of the fastest growing and most successful companies in the digitization of HR management processes in the healthcare business.

In our team of experts, you will shape the future of Planerio and help us change the way of collaboration in the healthcare system.

Your responsibilities are...

- Redeveloping the cross-platform app in React Native (PHP backend via REST API)
- Setting up the software concept and implementing technical requirements guided by experienced developers
- Coordinating of requirements with internal and external contact persons
- Creating and conducting of unit and system tests

Your qualifications...

- React Native and REST-API skills are required
- Knowledge in Java and software-as-a-service architectures, as well as experiences with tools of agile software development (Bitbucket, JIRA, etc.) are very helpful
- Symfony Framework, PHP and GDPR knowledge is a plus

We offer...

- Free choice of IT equipment and operating system
- Hackathon events such as our Work Week in Tenerife and regular social events with other startups
- An above-average salary
- An office in the heart of Munich (Karlsplatz, Stachus) with a panorama view into the Alpes
- Free coffee and water
- Assistance in finding an apartment
- Flexible working hours in a financially solid and growing business
- A positive error culture and opportunities for further education and helpful colleagues
- Future oriented projects in the health care market with a very social user base
- A young and motivated team with international backgrounds
- The opportunity to conduct student projects in subjects of artificial intelligence, evolutionary algorithms, complex UX / UI and much more.
- The prospect of a permanent position after being a working student at Planerio

We are looking for people who ...

- Have initial experience in web development or project work
- Are self-initiated and proactive
- Communicate well in English, German is a Plus
- Are passionate about web development and working out smart solutions
- Want to work as part of a highly motivated team
- Curious about the latest technologies and passionate about working in a fast-growing startup
