

## Mit Plan in die Zukunft

Digitales Personalmanagement  
im Gesundheitswesen

### **Position: Senior Java Developer (Backend) m/f/d**

#### **About Planerio**

With its integrated web and smartphone app services, Planerio digitizes all business processes related to work shift scheduling, increases transparency and thus improves the motivation and satisfaction of the entire workforce in hospitals, medical practices and nursing facilities.

Because of its unique capabilities and technological innovation, Planerio is one of the fastest growing and most successful companies in the digitization of HR management processes in the healthcare business.

In our team of experts, you will shape the future of Planerio and help us change the way of collaboration in the healthcare system.

#### **You will be responsible for:**

- Co-designing our database and software architecture based on industry standards
- Improving our continuous integration and scrum processes
- The implementation of technical and business requirements in cooperation with Product Management
- Creating and implementing unit and system tests
- Mentoring our junior developers

#### **Your qualifications:**

- Java, SQL und REST-API skills are required on Senior Level
- Spring Boot experience (or a similar framework) is a must
- Knowledge of SaaS- and event-based architectures built on e.g. Kafka are a must
- Basic PHP/ JavaScript literacy is mandatory
- Some knowledge of Kotlin is a bonus
- Familiarity in tools of agile software development (Bitbucket, JIRA, etc.) will be helpful
- Symfony Framework, ReactJS and GDPR knowledge is a plus

#### **We offer...**

- A financially solid and fast-growing business with positive error culture and much room for your personal development
- Free choice of most IT equipment and operating system
- Hackathon events such as our Work Week in Tenerife 2018, Mallorca 2019 and regular social events with other startups, free German classes for internationals and many social benefits
- A central, modern office with a panoramic view over the city
- A young team with 7 different backgrounds and languages
- Future-oriented, cutting-edge projects (AI) in the health care market

#### **We are looking for people who ...**

- Have 4+ years experience in backend development / project work
- Carry a proactive and entrepreneurial mindset and like to take ownership
- Communicate well in English, German is a plus
- Are passionate about high-quality development and working out smart solutions
- Are curious about the latest technologies and working in a fast-growing startup
